Python (PCEP), ITIL ticketing, KPI reporting

PROFILE

IT professional with 3+ years spanning technical support, network administration, and help desk leadership, now focused on a cybersecurity career. Currently a Tier 2 IT Service Analyst and part-time Cybersecurity Instructor, holding a full CompTIA stack (Security+, Network+, Server+, A+) plus PCEP, with hands-on experience in Wireshark, Nmap, and Nessus. Known for translating complex problems into clear resolutions and building the documentation and process discipline that strong security teams depend on. Seeking a SOC Analyst or Security Engineer role, with a long-term path toward AI Security Engineering.

EXPERIENCE

● Tier 2 IT Service Analyst

AUG 2025 – PRESENT

Crane Group · Columbus, OH

- Provide Tier 2 support and escalation across enterprise systems, resolving complex hardware, software, and network issues
- Administer Active Directory and Microsoft 365, including account provisioning and access management
- Maintain documentation and follow security and escalation procedures to support compliance

● Substitute Instructor, Cybersecurity

FEB 2026 – PRESENT

C-TEC of Licking County · Newark, OH

- Teach cybersecurity fundamentals part-time, covering networking, security concepts, and hands-on tools for postsecondary students
- Translate real-world IT and security experience into practical instruction for learners entering the field

○ Help Desk Supervisor — Quality, Training & Customer Experience

MAY 2025 – AUG 2025

Virtual Technologies Group · Maumee, OH

- Led support operations for 1,000+ clients across enterprise environments, providing Tier 3 escalation on high-priority issues
- Maintained a 95%+ CSAT while overseeing 30–50 weekly support requests
- Strengthened documentation and compliance through structured ticket audits and clearer escalation procedures
- Authored 50+ knowledge base articles, raised first-contact resolution by 15%, and streamlined technician onboarding

○ Help Desk Technician, Tier 2

OCT 2024 – MAY 2025

Virtual Technologies Group · Maumee, OH

- Resolved escalated Tier 2 issues and optimized FreePBX configuration to improve VoIP call quality by 20%
- Promoted to Help Desk Supervisor within ~7 months based on technical performance and leadership

EXPERIENCE — CONTINUED

○ IT Help Desk Technician I

JUL 2024 – OCT 2024

Hudson Valley Credit Union · Remote · Contract

- Managed and provisioned users in Active Directory and supported 50+ applications in a financial services environment
- Delivered remote support under the compliance-driven processes of the banking sector

○ IT Support Specialist I

SEP 2023 – JUL 2024

OTC Industrial Technologies · Columbus, OH

- Provided Tier 1–2 support via Jira, handling 20–40 tickets weekly with under one-hour average resolution
- Managed Active Directory accounts for 300+ users and maintained IT compliance and access controls
- Authored knowledge base articles that cut repeat issues by 15% and supported remote tooling, asset systems, and MDM

○ IT End-User Support Engineer

OCT 2022 – SEP 2023

DataServ · Newark, OH

- Provided on-site and remote technical support to Newark City School District across 14 buildings
- Imaged and deployed 50+ devices for incoming staff and led a district-wide collection of switches and networking equipment
- Supported Active Directory, wireless connectivity, and Microsoft 365; repaired laptops, Chromebooks, projectors, and smartboards

EDUCATION

Cybersecurity & Information Technology

C-TEC of Licking County

Sep 2022 – Aug 2023 · Newark, OH

PROFESSIONAL FOCUS

Actively building toward AI Security Engineering through hands-on labs and continued certification. Current focus areas include SIEM and detection engineering (Splunk), security automation with Python, and applying Active Directory and Microsoft 365 administration to identity and access security.
